

SPA YieldSense Kits available for these Agco Combine Models

Massey Ferguson: 8570, 8780, 8780XP, 9690, 9790, 9695, 9795, 9895, 9520, 9540, 9560, 9545, 9565

Gleaner: R50, R60, R70, R52, R62, R72, R55, R65, R75, R66, R76, S67, S77, S68, S78, S88, S9 ,A75, A85, A76, A86

Kit will include:

- PP Flow Sensor mounted on custom bracket, All required PP harnesses, YSMs, our custom built adapter harnesses
- Instructions, Template for modifying elevator chain paddles
- 2 optional harnesses are available if needed for adapting to factory moisture sensor or GPS

What is not included:

- PP S690 elev chain 750836, there is extra labor involved in modifying (trimming paddles) the PP elev chain
- Possible extra elev chain paddle and links (depending on model) 750866
- Any GPS harnesses

Additional information:

- We want you to treat this like a "beta" type product from the aspect that we are still learning and trying to make it better.
- If a dealer / grower is looking for a kit that they pull out of the box and is an easy 4 hour install, this is not for him, there may some modifications needed because of slight variations between machines
- We also want to be real clear, this is not a PP supported kit, but they do support what we are doing.
